DETAILED ACTION

Allowable Subject Matter

Claims 18-27 are allowed.

The primary reason for the allowance of claims 18-24 is the inclusion of the method steps of detecting at least one value of a pre-determined parameter of a time function related to said time rate of change of moisture percentage; and determining and selecting an optimum heating temperature for the sample in accordance with the detected value of said parameter by determining a first value of the parameter at a subsequent heating temperature using a second value of the parameter at an immediately preceding heating temperature, comparing the first and second values, and in response to the comparison, determining and selecting the immediately preceding heating temperature as the optimum heating temperature. It is these steps found in each of the claims, as it is **claimed in the combination**, that has not been found, taught or suggested by the prior art of record which makes these claims allowable over the prior art.

The primary reason for the allowance of claims 25-26 is the inclusion of the method steps of detect at least one value of a pre-determined parameter of a time function related to said time rate of change of moisture percentage; and determine and select an optimum heating temperature for the sample in accordance with the detected value of said parameter. It is these steps found in each of the claims, as it is **claimed in**

the combination, that has not been found, taught or suggested by the prior art of record which makes these claims allowable over the prior art.

The primary reason for the allowance of claims 27 and 28 is the inclusion of the limitations of an said controller detecting at least one value of a pre-determined parameter of a time function related to said time rate of change of moisture percentage, and determining and selecting an optimum heating temperature, using a temperature sensor, for the sample in accordance with the detected value of said parameter. It is these limitations found in each of the claims, as they are **claimed in the combination**, that has not been found, taught or suggested by the prior art of record which makes these claims allowable over the prior art.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Demetrius R. Pretlow whose telephone number is (571) 272-2278. The examiner can normally be reached on Mon.-Fri. 8-4:30.
